

NRSAWA Supervisor Training

Overview

The New Roads and Street Works Act requires that anyone who executes, works for, or on behalf of a utility company, is qualified for the activities being carried out.

Any street works site must have at least one qualified operative on site at all times during works, and the site must have a qualified supervisor appointed to the site who can oversee the works. The supervisor need not be on site at all times, but must be able to adequately carry out the role. The supervisor qualification does not replace or over rule the operative qualification and one person cannot cover both roles at the same time.

The courses are arranged for delegates to become qualified in combinations of operative or supervisor units. For your guidance, operatives are manually carrying out the work, supervisors are trained to make sure that the operatives are doing the work correctly and safely.

Who Should Attend?

Courses are designed for candidates to perform supervisory duties over operatives who physically carry out the work on the roadways and highways. Courses vary in their combinations of the units to provide delegates with the skills and knowledge to perform supervisor duties in accordance with the Street Works Act 1991.

Written work is included in this course.

Course Content

The following units are covered:

- 001 - location & avoidance of underground apparatus
- 010 - monitoring, signing, lighting & guarding
- 011 - monitoring excavation in the highway
- 012 - monitoring reinstatement & compaction of backfill layer
- 013 - monitoring reinstatement of sub & road base in non bituminous material
- 014 - monitoring reinstatement of bituminous materials (may not be included in the course)
- 015 - monitoring re-instatement of concrete slabs (may not be included in the course)
- 016 - monitoring re-instatement of modular surfaces and concrete footways

Please note: not all units are completed at each centre, please call for details.

DURATION

5 Days

NRSA Unit 10

Monitoring Signing, Lighting & Guarding

The NRSA unit 10 supervising signing, lighting and guarding course is required for street workers that supervise other workers setting up signing, lighting and guarding on streets and pathways.

The course can be taken at one of our UK wide training centres, or on your site. A suitable location would be anywhere that a realistic simulation of traffic can take place or on a real road with unpredictable traffic and pedestrians.

Assessment

Delegates must be able to:

- Provide detail for an intended site, preferably from a real road, showing all distances & dimensions in accordance with the Safety at Street works and Road Works Code of Practice
- Make formative decisions & recommended remedial action from a given plan
- Observe an operative surveying a work site & record observations and remedial action required from the site plan
- Observe an operative setting up and taking down a site
- Record observations made and explain reasons for agreeing or disagreeing with site operations and working practices
- Explain any remedial action required
- Complete the part B question paper
- Provide evidence from the work place where the assessment is carried out on a simulated site. A simple statement from the employer would not be sufficient to infer competence
